SEAPA PILOT ORDERING INFORMATION

Requests for pilots may be made directly with the dispatchers via telephone at (907) 225-9696, or e-mail to pilots@seapa.com.

The SEAPA website contains a detailed list of the information necessary to order a Pilot. The Pilot office appreciates the earliest possible notification of a vessel request for a Pilot to promote effective and efficient dispatching. Attention is drawn to 12 AAC 56.205(c) regarding minimum ordering notice and changes which states:

In the Southeastern Alaska region, an agent, owner, or master of a vessel shall inform a pilot of a vessel movement at least 48 hours before the movement in order to provide sufficient time for the pilot to arrive at the vessel by the available means of transportation.

An agent, owner, or master of a vessel shall again advise the pilot of a vessel movement at least 24 hours before the movement.

A pilot will be considered unavailable for service only if the timely notice required by this subsection is given and a pilot does not show up at the vessel to render service.

If notice is not given as required under this subsection and the pilot is unable to reach the vessel to render pilot services, the vessel or vessel's owner may be charged for the transportation costs incurred by the pilot in attempting to reach the vessel and for the pilotage charge and all other charges that would have been incurred had the pilot reached the vessel and provided pilotage services.

When an order for a pilot has been placed, if there is a subsequent change in the order, the vessel is liable for all pilot costs incurred prior to the change in order, as well as subsequent costs associated with the change.

Please inform the Pilot office of any special information concerning the movement of the vessels, specifically address if the ETA or ETD is tentative or firm. It is important to provide the Pilot office with a timely and responsive point of contact for any questions, concerns or changes the office may have regarding the request for a Pilot.

OUR DISPATCHERS ARE ON DUTY 24 HOURS A DAY, 7 DAYS A WEEK AT 907-225-9696.

The normally scheduled SEAPA Pilot office hours are:

Summer Mid May – Mid Sep		Winter Mid Sep – Mid May	
Mon – Fri	0900 – 1530	Mon – Fri	0930 - 1530
Saturday	0800 – 1200	Saturday	Closed
Sunday	0800 – 1200	Sunday	Closed

Southeast Alaska Pilots’ Association 2023 Officers:

President: Mark Lundamo
Vice President: Ron Leighton
Secretary: Douglas Sturm

Business Manager: ð ssie Li

Dispatcher: Sarah Upham

MASTER-PILOT INFORMATION EXCHANGE

The Master-Pilot Information Exchange is a critical activity in the process of establishing and maintaining situational awareness and communications. The exchange enhances the level of trust, sets expectations, and eliminates assumptions that either the Master or the Pilot is aware of a certain fact or situation. By taking the time to give each other the necessary information, the safety of our transit will be enhanced.

In addition to the suggested minimum information to be exchanged listed on the opposite page, please ensure the following:

Ship's business conducted on the bridge is in English.

The Pilot is provided access to navigation equipment that meets the standards required by the vessel's classing society, the IMO and SOLAS for Bridge Watch Officer's use. This navigation equipment may include, but is not limited to, VHF radios; radars; ARPAs; compass and gyro repeaters; GPS and AIS data; electronic charts display and information systems (if equipped); propulsion instrumentation; and whistle and spotlight controls.

Proper compliance with marine casualty and other reportable events as required in accordance with United States 33 CFR 164, State of Alaska 12 AAC 56.960, and other applicable requirements.

Check with the Pilot Boat and/or the Pilot for specific Pilot Ladder requirements.

Please ensure that the Pilot is notified of all factors affecting safety. If at anytime, the Master or a member of the crew has a question about navigation or safety of the vessel, please communicate your concerns or questions to the Pilot. If there are requirements that are not understood, please ask so that the Pilot may provide additional explanation to ensure that they are complied with.

SUGGESTED MINIMUM INFORMATION TO BE EXCHANGED

IMMEDIATE SITUATION:

- Check ship's position
- Verify course and speed
- Ascertain location and rules of the road situation for other vessel traffic
- Confirm immediate transit intentions and requirements

VESSEL CHARACTERISTICS:

- Vessel deficiencies – anything not working properly
- Pilot Information Card
- Status of anchors
- Status of helm
- Gyrocompass error
- Drafts fore and aft
- Status of radios (ensure Channels 13 and 16 monitored, Ch 13 on US)
- Status of radar(s)
- Propulsion type and restrictions (e.g. standby time, number of starts)
- Thruster horsepower and status
- AIS Status (proper information inputted & reflected)

TRANSIT PLAN:

- Track lines
- Expected tides, currents, weather
- Speeds at critical locations
- Expected traffic, fisheries openings
- Plant status at critical locations
- Notice required for crew call out
- Tug availability, location & makeup
- Mooring/unmooring plan

PILOT LADDER INSTRUCTIONS

1. Contact the Pilot Boat at least 30 minutes prior to arrival for desired lee & speed.
2. The ladder must be kept clean and used solely for embarking & disembarking Pilots.
3. Rigging of the ladder, along with embarking & disembarking of the Pilot must be done under the supervision of a licensed officer.
4. DO NOT DEPLOY the ladder until the Pilot Boat is firmly alongside. Ship's crews should be trained to tend the ladder to ensure it does not get caught between the ship and the Pilot Boat.
5. The area of the deck where the Pilot boards & departs must be well lighted and clear of obstructions, oils, greases, etc.
6. A clear, safe passage for the Pilot to pass safely from the ladder to the deck is required. If portable stanchions and steps are used, they must be securely fastened. A heaving line and a ring buoy with self-igniting light must be provided.
7. If the deck is loaded with logs or other cargo, ensure a safe passage to and from the ship's bridge is provided.
8. The ladder must be made in one length and not consist of two ladders shackled or lashed together, fitted with spreaders about 10 feet apart to comply with SOLAS Regulation 17, Chapter 5.
9. Sufficiently illuminate the ladder at night, from aft so the light does not shine into the Pilot's eyes or the Pilot Boat Operator's eyes.
10. No tag lines, pull-up ropes, or trailing lines may be attached to the lower ends of the ladder.
11. Rig well clear of vessels discharges, scuppers at about midships or just aft. Keep away from the stern and the turn of the hull.

12. Manropes at Pilot's direction: Normally: on arriving – NO MANROPES; on departure – MANROPES MANDATORY unless specifically NOT requested. Manropes approximately 3" manila in circumference.
13. If the distance from sea level to point of access exceeds nine meters (about 30 feet), rig an accommodation ladder in accordance with the diagram.
14. During Pilot boarding and disembarking, the Master must be in a position to observe the transfer from the vessel bridge wing, and have a portable VHF radio set to the Pilot Boat frequency in order to communicate immediately in event of an emergency.

Pilot Boats and Tugs will normally work on US VHF-FM Channel 12 as the working channel between the Pilot Boat and the Ship. If initial contact cannot be made on VHF-FM Channel 12, contact should be attempted via VHF-FM Channel 16.

The Pilot Boat will confirm the desired transfer speed and heading. Masters are requested to comply as closely as possible to the requested heading and speeds to ensure a safe Pilot transfer.

If for any reason, the Master feels the Pilot Boat instructions are unclear or unsafe, the Master should ask for additional explanation. The Master should always alert the Pilot Boat if they feel they must deviate from the agreed upon instructions or if an unsafe situation arises.

REQUIRED BOARDING LADDER ARRANGEMENTS FOR PILOTS BOARDING SHIPS WITH HIGH FREEBOARD (MORE THAN 9 M) WHEN NO SIDE DOOR AVAILABLE

AIS REQUIREMENTS

AIS (Automatic Identification System for ships) requirements (CFR 33, 164.01) apply to all self-propelled vessels of 1600 GRT or more when operating in the navigable waters of the United States. The requirements for Bridge-to-Bridge radiotelephones (CFR 33, 26.04) also apply to AIS. Included in the requirements for the AIS system is the requirement that there shall be, on each vessel over 1600 GRT, a functioning AIS Pilot Plug. This plug shall be available for pilot use, easily accessible from the primary conning position of the vessel and near 120 volt AC power via a 3-prong receptacle.

MARINE PILOT STATUTES & REGULATIONS

SELECTED EXCERPTS

GENERAL RULE – PILOTAGE BOUNDARIES (12AAC56.090):

Pilotage is compulsory at all entrances from seaward to Alaska bays, sounds, rivers, straits where the passage is within three nautical miles of this state, or other estuaries for which specific boundaries are not otherwise described. The extent of waters subject to compulsory Pilotage in such Alaska bays, sounds, rivers, straits within three nautical miles of this state, and other estuaries are those waters in-shore of a line drawn approximately parallel with the general trend of the shore through the outermost aid to navigation, or if no aid to navigation exists, then a line drawn from headland to headland across the mouth of the entrance.

SPECIFIC PILOTAGE BOUNDARIES SOUTHEAST ALASKA (12AAC56.100):

(1) All waters inside a line drawn from Cape Spencer Light due south to a point of intersection which is due west of the southern extremity of Cape Cross; then to Cape Edgecumbe Light; then through Cape Bartolome Light and extended to a point of intersection which is due west of Cape Muzon Light; then due east to Cape Muzon Light; then to a point which is one mile, 180° true, from Cape Chacon Light; then to Barren Island Light; then to Lord Rock Light; then to the southern extremity of Garnet Point, Kanagunut Island; then to the southeastern extremity of Island Point, Sitklan Island; then from the northeastern extremity of Point Mansfield, Sitklan Island, 40° true, to the mainland.

EXCLUSIONS (12AAC56.110):

Vessels are excluded from the use of a state licensed Marine Pilot in compulsory Pilotage waters when proceeding directly between points outside Alaska and an established pilot station for the express purpose of embarking or disembarking a pilot in the following situations:

- (1) travel via Revillagigedo Channel to Twin Islands Pilot Station; in transiting Revillagigedo Channel, ships must stay west of longitude 131°05';
- (2) travel via Clarence Strait to Guard Island Pilot Station, Point McCartey Pilot Station and Chasina Point Pilot Station;

- (3) travel via Cape Muzon in Cordova Bay to Shoe Island Pilot Station for vessels proceeding to Long Island and to Mellen Rock Pilot Station for vessels proceeding to Hydaburg;
- (4) travel via Cape Bartolome in Bucareli Bay to Cabras Island Pilot Station;
- (5) travel via Cape Ommaney in Chatham Strait to Frederick Sound Pilot Station;
- (6) travel via Sitka Sound to Sitka Sound Pilot Station;
- (7) travel via Yakutat Bay to Yakutat Pilot Station.

PILOT PICKUP POINT EXCEPTIONS (12AAC56.120):

- (b) Inside compulsory Pilotage waters, embarking or disembarking pilots at any location inside of an established pilot station may be undertaken only by agreement between a:
 - (1) Pilot and a Ship's Master in an emergency or for reasons of safety when required by extreme weather or other unforeseeable circumstances; or
 - (2) Pilot organization and a ship's agent on a trial basis to accommodate a newly established port, trade, or route.
- (c) If safe and reliable transportation cannot be provided to or from the pilot station, the nearest pilot station with safe and reliable transportation shall be used. If reasonable effort has been made to offer safe and reliable transportation and the vessel, equipment, or personnel do not meet the minimum standards set out in 12AAC56.120(d), the pilot may use the transportation provided.

PENALTIES (AS 08.62.190):

- (a) A master or owner of a vessel required by this chapter to employ a licensed pilot who fails to do so when a licensed pilot is available, unless the perils or hazards of the sea prevent the employment of a pilot, is guilty of a misdemeanor and upon conviction, is punishable by a fine of not less than \$5,000 nor more than \$15,000 for the first offense and not less than \$10,000 nor more than \$30,000 for the second offense.

FOREIGN PLEASURE CRAFT EXEMPTIONS (AS 08.62.180):

- (b) The operator of a pleasure craft of foreign registry of more than 65 feet overall length but less than 175 feet overall length may apply for an exemption from the pilotage requirement. AS 08.62.180(b) provides specific exemption applica-

tion requirements such as lead time, fees, period of validity, limitations and conditions for revocation. An exemption issued under this subsection does not exempt a vessel from the requirement to employ a Pilot licensed under this chapter while the vessel is in Wrangell Narrows or in the water between Chatham Strait and Sitka via Peril Strait.

The operator of a pleasure craft of foreign registry of more than 65 feet overall length but not more than 125 feet overall length that has received an exemption under AS 08.62.180(b) shall proceed upon initial entry into state water to the first port of call to receive navigational and safety information from an agent registered under AS 08.62.040(a)(3) who is employed by the operator of the vessel. The navigational and safety information provided by the agent must be approved by the marine pilot coordinator and annually reviewed, revised, and approved as appropriate by the board at its spring meeting.

The operator of a pleasure craft of foreign registry of more than 125 feet overall length but less than 175 feet overall length that has received an exemption under AS 08.62.180(b) shall employ a Pilot licensed under this chapter from the initial entry into compulsory pilotage water of the state to first port of call. The marine pilot shall provide navigational and safety information relating to the pilotage region to the operator of the vessel.

DUTIES OF PILOTS (12 AAC 56.960):

- (a) A pilot shall be on duty, at the conn, piloting the vessel at all times when the vessel is in transit or maneuvering in compulsory pilotage waters. A pilot at the conn may only be relieved for cause by the vessel's master or the officer in charge of the navigational watch when the master is absent from the bridge. The pilot may voluntarily relinquish the conn to a ship's officer, but may reassume the conn at any time.
- (b) A passenger vessel in transit of compulsory pilotage waters not excluded under 12 AAC 56.110 must carry two pilots on board except during an entry transit between a pilot station and a harbor or anchorage within compulsory pilotage waters, or an exit from compulsory pilotage waters where the entry or exit transit is normally less than eight hours.
- (c) A non-passenger vessel in a continuous transit of compulsory pilotage waters of Southeast Alaska that is expected to exceed eight hours must employ two pilots.

SOUTHEAST ALASKA PILOT STATIONS OR PICKUP POINTS (Reference 12 AAC 56.120)

Cabras Island: 1.0 miles 315° true from Cabras Island; approximate position 55° 22.0' north latitude, 133° 24.8' west longitude

Cape Spencer: 3.2 miles 090° true from Cape Spencer Light; approximate position 58° 12' north latitude, 136° 32' west longitude; this is a seasonal station open only during the period May 1 through Sept. 30

Chasina Point: 1.25 miles 013° true from Chasina Point; approximate position 55° 18' north latitude, 132° 01' west longitude

Frederick Sound: 3.0 miles 310° true from Cornwallis Point Light; approximate position 56° 58' north latitude, 134° 21' west longitude

Guard Island: 1.0 miles 315° true from Guard Island Light; approximate position 55° 27.5' north latitude, 131° 53.9' west longitude

Mellen Rock: 0.6 miles 050° true from Mellen Rock Light; approximate position 55° 02' north latitude, 132° 39' west longitude

Petersburg Bar Range: not west of 132° 58.0' west longitude; station is seasonal, open only during the period from June 1 – August 31 for the embarkation and disembarkation of pilots for vessels with valid exemptions under AS 08.62.180(b)-(e), and for the purpose of transiting Wrangell Narrows between Petersburg and Point Alexander, as follows:

(A) transit may occur only during

- (i) the period 30 minutes before and after slack water at the Port of Petersburg;
- (ii) daylight or civil twilight hours; and
- (iii) periods of visibility that allow the Petersburg Bar Range to be viewed visually from Buoy WN;

(B) during transit, a minimum of five foot under-keel clearance must be maintained between Buoy WN and Buoy 60

Point Alexander: not north of Point Alexander Light at 56° 30.33' north latitude; station is seasonal, open only during the period from June 1 – August 31 for the embarkation and disembarkation of pilots for vessels with valid exemptions under AS 08.62.180(b)-(e) and for the purpose of transiting Wrangell Narrows between Petersburg and Point Alexander

Point McCartney: 1.0 miles 090° true from Point McCartney Light; approximate position 55° 06.8' north latitude, 131° 40.5' west longitude

Shoe Island: 2.0 miles 090° true from Shoe Island Light; approximate position 54° 57' north latitude, 132° 41' west longitude

Sitka Sound: 0.25 miles 000° true from the Eckholms Light; approximate position 57° 00.9' north latitude, 135° 21.4' west longitude. Also, approximately 2.5nm SSW of Bieli Rocks for vessels bound for Sitka Cruise Terminal

Twin Island: 2.0 miles 045° true from Twin Islands Light; approximate position 55° 10.0' north latitude, 131° 10.4' west longitude; station is seasonal, open only during the period May 1 through Sept. 30

Yakutat: 1.0 miles 315° true from Yakutat Bay Lighted Whistle Buoy 4; approximate position 59° 36.3' north latitude, 139° 52.5' west longitude

Enter the table with the duration of rise or fall which most nearly agrees with the actual value and on that horizontal line find the time from the nearest high or low water which agrees most nearly with the corresponding actual difference. The correction sought is in the column directly below on the line with the range of tide. When the nearest tide is high water, subtract the correction. When the nearest tide is low water, add the correction.

For more accuracy at the locations listed above, add (+) or subtract (-) the corrections given for the time and height of high and low water.

When an asterisk (*) precedes a difference, that difference given is a ratio, and the height of high or low water at the reference station is multiplied by the ratio to determine the height at the location.

CURRENT AND TIDE INFORMATION

Cautionary Notice and Disclaimer

Users of this publication are cautioned that the tidal current and tide height predictions are only approximations of future natural events and as such they will differ in varying degrees from actual observations.

Allowances for error should be made when estimating current flows and water levels based on these predictions.

Furthermore, tidal predictions do not take into account meteorological effects. Differences between predicted and observed currents and tides may occur with various weather conditions, notably extended rainfall, snow melt, and periods of strong wind. Users are warned that the differences between predicted and observed currents and tides due to various weather conditions may be significant.

The current and tide predictions presented in this publication are based on government data supplied by the National Oceanic and Atmospheric Administration (NOAA). There is no guarantee, and no representation is made that the data provided by NOAA is accurate. Although care has been exercised to ensure that the predictions appearing in this publication are consistent with NOAA information, there is no guarantee, and no representation is made that they are in all cases correct.

HISTORIC NOAA TIDE & CURRENT CORRECTIONS As of 2020 NOAA stopped supporting the correction tables on the previous pages. The tables included in your Tidebook are historic and can provide only a reasonable approximation of the tide/current at the locations listed. NOAA does provide daily predictions for both harmonic and subordinate stations at:

tidesandcurrents.noaa.gov

Daylight Saving Time Notice: It is not necessary to adjust any of the times used in this booklet. All times are Alaska Daylight Time (ADT).

VOLUNTARY VESSEL TRAFFIC PROCEDURES FOR GILLNET VESSELS & DEEP DRAFT TRAFFIC

Voluntary vessel traffic procedures have been adopted for gillnet vessels and deep draft traffic to facilitate safety and commerce. In areas so designated, traffic lanes, about 0.2 nm wide have been established along the standard deep-draft tracklines and general procedures are requested of deep-draft traffic and gillnet vessels.

Cruise ships, ferry vessels and other deep-draft vessels are requested to observe the following practices:

- Announce your presence 30-45 minutes prior to entering the area and at regular intervals while transiting through the area.
- Travel along indicated tracklines as much as possible and maintain a safe speed.

Gillnet vessels (and other fishing vessels) are requested to observe the following practices:

- Adequately mark the net end with lights and radar reflectors.
- Monitor VHF-FM Channels 13 and 16 and listen for broadcasts by deep-draft vessels in the area.
- Provide for two-way traffic of large vessels along the standard tracklines.
- Warn other gillnet vessels if they appear to be in the lane when there is commercial traffic approaching.
- Do not place sleep sets within or adjacent to the shipping lane.

Procedures for the Upper Lynn Canal and Upper Sumner Strait have been formalized and published in the U.S. Coast Pilot Volume 8.

Similar considerations for the areas indicated on the following chartlets are requested for the Lower Lynn Canal, Saginaw and Favorite Channels area, the entrances to Sitka Sound and Eastern Channel, and Stephens Passage in the vicinity of Point Arden.

DEEP DRAFT VESSEL TRACKLINES IN SUMNER STRAIT IN THE VICINITY OF POINT BAKER

Please refer to page 117 to review the voluntary vessel traffic procedures for gillnet fishing vessels and deep-draft traffic.

A: 56-21.0N / 133-09.5W

B: 56-23.0N / 133-38.7W

C: 56-22.5N / 133-39.9W

DEEP DRAFT VESSEL TRACKLINES

GRAVE POINT TO POINT ARDEN

A: 58-03.5N / 134-04.5W

B: 58-06.1N / 134-05.4W

C: 58-10.2N / 134-09.0W

Please refer to page 117 to review the voluntary vessel traffic procedures for gillnet fishing vessels and deep-draft traffic.

DEEP DRAFT VESSEL TRACKLINES

LYNN CANAL, EAST AND WEST OF LITTLE ISLAND

A: 58-29.5N / 134-53.3W
B: 58-30.9N / 134-57.1W
C: 58-33.3N / 135-01.8W

Please refer to page 117 to review the voluntary vessel traffic procedures for gillnet fishing vessels and deep-draft traffic.

DEEP DRAFT VESSEL TRACKLINES

UPPER LYNN CANAL, ELDRED ROCK TO BATTERY PT

- A: 58-58.2N / 135-12.1W
B: 59-04.7N / 135-15.0W
C: 59-11.7N / 135-20.7W

Please refer to page 117 to review the voluntary vessel traffic procedures for gillnet fishing vessels and deep-draft traffic.
